Thank you for providing these comments Donna. I think we heard many good comments/concerns from the community last night and will work to ensure they are addressed in DEIR.

I would like to take you up on your offer for a tour. I currently plan on meeting Pat Brown out there on Monday morning January 7, 2013 to conduct site visits. Would you be available to meet on that day around 1PM? Mark and Ashley are also likely to attend.

Thanks,

Hello Robert,

The comments I read from at tonight's Soitec Solar PEIR scoping hearing are attached along with the 3 photographs of the Soitec CPV module, showing size and reflected glare, that I distributed to those in attendance.

Once again, I offer to provide staff a tour of these and other project areas from the community impact perspective rather than from the developer biased perspective. Numerous property owners requested the same during the scoping meeting.

Thank you for holding the hearing in our impacted community and for providing the maps.

Regards,

Donna
